

## You will find them everywhere in everything

If you search for *divisibility*,  
you will find it everywhere in everything!

If you search for *comparability*,  
you will find it everywhere in everything!

If you search for *connectivity*,  
you will find it everywhere in everything!

If you search for *sensitivity*,  
you will find it everywhere in everything!

If you search for *transformability*,  
you will find it everywhere in everything!

If you search for *substitutability*,  
you will find it everywhere in everything!

If you search for *satisfiability*,  
you will find it everywhere in everything!

*“Divisibility*

*Comparability*

*Connectivity*

*Sensitivity*

*Transformability*

*Substitutability*

*Satisfiability*

**You will find them everywhere in everything!**

*Is it unwise to study them?”*

***“Have you ever searched for  
those which are discoverable everywhere in everything?”***

Doesn't science search and study the *divisibility* of atoms, molecules, ions, cells, organelles, tissues, organs, guilds, words, numbers, equations, instruments, and other entities? Yes, science searches for it everywhere in everything!

Doesn't science search and study the *comparability* of atoms, molecules, ions, cells, organelles, tissues, organs, guilds, words, numbers, equations, instruments, and other entities? Yes, science searches for it everywhere in everything!

Doesn't science search and study the *connectivity* of atoms, molecules, ions, cells, organelles, tissues, organs, guilds, words, numbers, equations, instruments, and other entities? Yes, science searches for it everywhere in everything!

Doesn't science search and study the *sensitivity* of atoms, molecules, ions, cells, organelles, tissues, organs, guilds, words, numbers, equations, instruments, and other entities? Yes, science searches for it everywhere in everything!

Doesn't science search and study the *transformability* of atoms, molecules, ions, cells, organelles, tissues, organs, guilds, words, numbers, equations, instruments, and other entities? Yes, science searches for it everywhere in everything!

Doesn't science search and study the *substitutability* of atoms, molecules, ions, cells, organelles, tissues, organs, guilds, words, numbers, equations, instruments, and other entities? Yes, science searches for it everywhere in everything!

Doesn't science search and study the conditions which could be satisfied (*satisfiability*) by atoms, molecules, ions, cells, organelles, tissues, organs, guilds, words, numbers, equations, instruments, and other entities? Yes, science searches for it everywhere in everything!

*What will you do if nothing has divisibility, comparability, connectivity, sensitivity, transformability, substitutability, and satisfiability?*

What would your knowledge be if nothing has divisibility, comparability, connectivity, sensitivity, transformability, substitutability, and satisfiability?

Oh, beloved men and women,  
you can never defeat the laws of nature which govern all your knowledge, intelligence and wisdom!

*~ Sivashanmugam, P., Founder President of Intellectual Development Foundation*
